

Don't be without phone service!

FONE SITTER™

Automatically alerts you to any phone left off-hook throughout your home or if your phone service has been interrupted.

A must for homes with elderly or small children!

Has this ever happened to you? An elderly loved one didn't hang up their phone completely. Their line remained busy for hours. The only way to check on them was to call their neighbor, drive over to their house, or even worse, call the police. Ends up, it was simply a phone left off-hook by accident.

Or in your home, your toddler was playing with the phone. You didn't realize it was left off-hook, and people tried calling you all evening, only to get a busy signal. **For peace of mind, get a FONE SITTER.**

Simple to use
with adjustable volume
(requires 2 AAA batteries)

COMMAND

Don't be without phone service!

FONE SITTER™

SIMPLE TO USE

- Just one FONE SITTER™ will monitor one phone line for the entire house
